INTERNSHIPS

Tcsion-120, June 2022 - August 2022

- A detailed relationship among the various classifier involved in python were described. All the classifying models were made and the result were gained to acknowledge the results obtained to be closer or not. Through this internship I was not only able to technically but also non-technically.

Tcsion-45, May 2021 - June 2021

- It was a project based on the facts of learning platform on digital marketing. It was a good exposure on doing projects on the first year.

PROJECTS

Restaurant Application, August 2021 - December 2021

- It was a project developed on Java platform as a project component. It was developed by a team of three members. It was an great experiencing creating a new application where we would be able to order the food in restaurant and the bill would be generated as a normal online food application would do.

Blind stick, January 2022 - June 2022

- It was a project developed using microprocessors. It was done by team of two members. This project is all about detecting objects through sensors which would be useful for blind people by producing sounds.

Hospital Management System, January 2023 - June 2023

- This project is all about managing the hospital system through user interface which are created and designed by HTML and CSS. It is done by team of two members.

AWARDS AND HONOR

- In my 10th and 12th standard I had earned a cup for scoring the good mark in school and in college the management has provided scholarship for the past three years.
